

KAMI – DIVINE BODY NECTAR

February 5, 2017

March 2017 will see the arrival of a new **Perlanesse** product: **Kami**, a body nectar with **moisturizing, tensing and volume reducing properties**. After ten years, **Bimont Laboratories** have been successful to position **mother of pearl powder** and **donkey milk** as high quality nutri-cosmetics. The first one has a large quantity of proteins dealing with cell regeneration while the second one is a panacea of vitamins and oligoelements; together, they produce a perfect mixture for human skin.

As other Perlanesee products, Kami has an **immediate effect** on the epidermis tonus, a moisturizing result in 24 hours and an **anti-cellulite** outcome after one month of use. Its cherry flower fragrance adds pleasure and softness to the skin. In Japanese, kami stands for spirit, a divine being which can be venerated; it is under this idea that Perlanesse's new product completes a performing **cosmetics line** devoted to enlighten women -and men- skins.

Available from March 2017. More info:
